

REINFORCED BARRICADE TAPE

Product Specifications

Product Type

- Reinforced Barricade Tape

Description

- Reinforced Barricade warning tapes consist of high visibility yellow or red lead-free three-ply polyethylene with bold black letters. Each roll is woven with polyester fibers which provide a minimum of 300 lb. break strength. With no stretch and no sag our tape helps prevent accidents by increasing visibility of hazards and can be tied, stapled or nailed in place.

Material

- Polyethylene Film – lead free
- Woven Polyester Fibers
- Flexographic Polyethylene Ink

Thickness

- 7 mil

Standard Width

- 3"

Standard Length

- 500'

Standard Legends

- Caution / Cuidado
- Danger / Peligro

Physical Properties

- 300 lb. break strength
- Melt index: 1.0g/10 min.
- Tensile strength MD: 11411 psi (+/- 5%)
- Tensile strength CD: 11837 psi (+/- 5%)
- ASTM D-882
- Three-Ply (added strength)
- No stretch
- No sag
